In 1985 our company LUNDAGER was established in Western Jutland Denmark by present owner Ove Lundager. At this moment we produce over 20 million mini plants and approx. 1 million plants in other sizes. Our production area is 60.000 m². Olga Lundager and Oliver Lundager develop their own designs of the added value program in cooperation with our suppliers. The basic idea behind the design development is to create pots, which fit our plants in colors and proportions. Furthermore our added value concepts give our customers unique possibilities to make own customized products. LUNDAGER's vision is to be the preferred supplier of mini plants and added value concepts for mini green plants in Europe. Our values are based on innovation, great range, quality, service and responsible production.
